Text: Edwards and Penny *Differential Equations–Computing and Modeling*, Pearson, 3rd Edition

Course Grade: Your grade will be based on 4 components: class participation, quizzes, in-class exams, and the final exam. The total points you receive in this course is based on the following table.

Quizzes	150	points
Exam I	200	points
Exam II	200	points
Exam III	200	points
Final Exam	200	points
Class Participation	50	points
<hr/> Total	<hr/> 1000	<hr/> points

Homework: I will not collect homework. In the Syllabus there is a list of suggested exercises. You are supposed to work the exercises as soon as the material is covered in class.

Quizzes: Every Thursday, in the last half hour of class, there will be a quiz. The quiz problems will be similar to the list of homework problems. My intention is to write quizzes so that the student who diligently does all of the homework and keeps up with the class will do well on them. You will be allowed to use calculators on the quizzes. Additionally, I will drop your lowest quiz score so as to accommodate unavoidable absences, but *absolutely no make-up quizzes will be given.*

In-class: There will be three in-class tests, given on the Thursdays of the weeks indicated on the syllabus. You will be allowed to use calculators on the exams.

Final: The final for this class will be comprehensive and will be given 7:30 to 9:30 a.m. Friday, Dec. 21. Calculators are allowed on the final.

Note: The instructor reserves the right to modify the schedules (e.g. office hours, quiz dates etc) and procedures in this syllabus. Any such changes will be announced in class and posted on my web site. It is the student's responsibility to keep informed of such changes.
