

## **Math 203: Contemporary Mathematics**

Section 009, spring 2009

### **Writing assignment 1**

Assigned Tuesday, January 13; due Tuesday, January 27

The purpose of this first writing assignment is to give me an opportunity to get to know you a little better and see what you think about math.

First, introduce yourself. Some things you might consider describing include where you're from, your hobbies and interests, your major and why it interests you, or an interesting or unusual experience you've had.

For the second half of the paper I would like you to reflect on your experience with mathematics. Describe your previous mathematics background. What courses have you taken? Have you enjoyed them? What things in math do you like the most? What things do you like the least? If math were an animal, what animal would it be, and why? If you were in charge of designing a course like Math 203, what specific things would you do?
