

Rather than report one year at a time, here is the list of publications that have resulted from the Nebraska REU in Applied Mathematics since 2003:

References

- [1] K. Ahrendt, L. Castle, M. Holm, and K. Yochman, Laplace transforms for the nabla-difference operator and a fractional variation of parameters formula, *Communications in Applied Math.*, accepted and to appear.
- [2] S. Akeseh, J. Bracewell, A. Brucker, M. Foss, C. Hoffman, P. Radu, and T. Vossberg, Nonlinear diffusion models with peridynamic-type nonlocality, in progress.
- [3] S. Akeseh, J. Bracewell, A. Brucker, M. Foss, C. Hoffman, P. Radu, and T. Vossberg, Steady state models for nonlocal heat conduction in peridynamics, in progress.
- [4] D. Anderson, J. Bullock, L. Erbe, A. Peterson, and H. Tran, Chapter 3, pp 47-84 of the book *Advances in Dynamic Equations on Time Scales* Birkhauser, 2003.
